## Video Surveillance is Top Priority

The necessity for public and personal safety is top priority for both individuals and governments around the world. Video surveillance is a routine issue in security planning, and there is a constant search for innovative and intelligent technologies which will enhance security, particularly over multiple remote sites. Wireless broadband access is rapidly being acknowledged as a reliable solution for quality, real-time images for video surveillance.

## Wireless Networks Enable Enhanced Video Surveillance

The availability of new wireless broadband technologies such as WiMAX is creating additional opportunities for video surveillance network designers, particularly since it is now possible to add and place cameras in locations which were previously inaccessible by wireline. Furthermore, wireless broadband provides high-capacity connections, which are essential for high-resolution images, over tens of kilometers, completely segregated and secured with built-in data encryption mechanisms. Finally, wireless networks are easy to install and relocate to new locations, involve relatively small initial investments and maintenance costs, and offer 100% privately-owned connectivity - as opposed to expensive leasing of E1/T1/xDSL links from other local operators.

## Extensive Product Portfolio

Alvarion® offers a range of field-proven and award-winning products for fixed, nomadic and mobile wireless access for licensed and license-exempt frequencies

- BreezeACCESS® VL premium point-to-multipoint solution for license-exempt frequencies (900 MHz and 5.x GHz)
- BreezeNET® B point-to-point solution particularly suitable for swift, easy and secure video surveillance deployments
- BreezeACCESS VL SU-Video for wireless video surveillance solutions optimized for the high performance needs of the video surveillance market
- BreezeMAX® and BreezeMAX Extreme for fixed and Mobile WiMAX™ 802.16 licensed and license-exempt frequencies (2.x, 3.x and 5 GHz)
- BreezeMAX/BreezeACCESS Wi² for Wi-Fi 802.11 as a Wi-Fi mesh solution extension to the WiMAX network
- Video Power Supply: a single all outdoor enclosure providing power to the camera and Alvarion's wireless subscriber unit

### Alvarion Delivers Quality and Expertise

Alvarion delivers the expertise for implementing sophisticated and intelligent wireless networks for outdoor video surveillance solutions.

- Carrier class, robust and reliable system, field proven in over 3 million links
- Technology leadership with first WiMAX 802.16e solution for 4.9 and 5.x GHz
- Complete product portfolio for a variety of fixed and mobile requirements and a wide range of frequencies
- Extended range of up to 30 km and enhanced capacity supporting non-line-of-sight (NLOS)
- Quality video and voice support with optimized bandwidth allocation for real-time video communication requirements
- Hardware-based encryption methods and security mechanisms maintaining high performance (AES and FIPS)
- Special algorithm for smooth and reliable video transmission
- Strong business case - maximized efficiency, less equipment required and scalable pay-as-you-grow support

## Alvarion Delivers End-To-End Solutions

Alvarion has established partnerships with leading suppliers of security and video surveillance solutions. This gives Alvarion the leverage to offer customers seamless, end-to-end solutions which provide a range of benefits, including quick and easy integration, a wide variety of choice and operability with any camera and application. Furthermore, Alvarion's end-to-end video surveillance connectivity solutions are field proven for integration with a variety of cameras and applications and can be tailored to customer needs for optimal cost/performance.

**Acuicola Marina, Spain** one of the most important producers of farmed fish in the

Castellon region, has improved security and communications between offshore fish farms and headquarters using a PTP wireless network.

**The CCRPF community in France** is using multiple wireless video links to protect villages surrounding Charles de Gaulle airport.

**Doñana National Park, Spain** a UNESCO world

heritage site, uses a wireless video surveillance network to support real-time control and monitoring for conserving species and sharing data with other centers worldwide.

**Caravaggio Municipality, Italy** is using wireless-based video surveillance to support emergency and law enforcement services in an area that could

not be covered by conventional wired networks. This deployment includes wireless LANs, IPTV cameras, and in the future, a mobile office with a video control system.

**Mid-America Regional Council (MARC), US** has

implemented a 2 state, 23 city, 17 jurisdiction and 600 intersection wireless network, supporting an intelligent traffic system for reduced pollution, better traffic flow and emergency evacuation capabilities.

## About Alvarion

Alvarion (NASDAQ:ALVR) is a global leader in 4G wireless communications with the industry's most extensive customer base with hundreds of commercial WiMAX deployments. Alvarion's industry leading solutions enable true open 4G and vertical applications for service providers and enterprises. Through an OPEN WiMAX strategy, superior IP and OFDMA know-how, and ability to deploy large scale end-to-end turnkey networks, Alvarion is delivering the true 4G broadband experience today ([www.alvarion.com](http://www.alvarion.com))
