PRODUCT INFORMATION

The AW3161 antenna operates between 3300-3800MHz (CBRS) covering bands B42, 43 & 48. It was developed for 4x4 fixed wireless applications requiring variable electrical tilt. Electrical tilt allows optimisation of the elevation beam for throughput and coverage. Manual Electric tilt (MET) enables electrical tilt adjustment at site.

APPLICATION

Alpha Wireless panel antennas provide wireless network operators the highest performance and quality. Panel antennas are generally used in sectorized applications. These antennas are designed for optimal radiation patterns improving overall network performance. A horizontally spaced array provides enhance MIMO performance with full 4x4 operation or receive diversity RF functions.

STANDARD & CERTIFICATIONS

Certification	BS EN ISO 9001:2015
